PERSONAL SUMMARY

Data Analyst with strong experience in SQL, Python, BigQuery, and Looker/Power BI, specialising in commercial performance tracking, demand trends, and time-series data analysis. Proven track record in building automated reporting workflows, translating complex datasets into actionable stakeholder insights, and supporting data-driven business decisions.

WORK EXPERIENCE

Data Analyst, Filum.ai

March 2026 - Present

Onsite

- Built and maintained centralized **Looker** and SQL dashboards tracking 50+ commercial KPIs across sales pipeline, product adoption, customer engagement, and revenue performance, helping teams monitor movements and respond to exceptions.
- Analyzed historical transaction and behavioural data in **BigQuery** to build lead scoring models, improving conversion rates by **15%** and supporting prioritisation decisions across commercial teams.
- Investigated churn signals, feature-adoption trends, and unusual KPI movements, translating data patterns into concise recommendations for Sales, Customer Success, and Product stakeholders.
- Partnered with non-technical teams to define reporting requirements, validate metric logic, and improve dashboard usability so stakeholders could interpret performance trends and make faster decisions.

AI Engineer Intern, CoverGo

May 2025 - February 2026

Remote

- Designed structured validation datasets with 200+ Q&A pairs to assess model outputs, documenting exceptions, expected results, and recurring quality issues for financial and insurance use cases.
- Developed **Python** and **Excel** automation that reduced manual validation time by **25%**, turning repeated checks into controlled workflows with clearer pass/fail reporting.
- Built data retrieval workflows using APIs and SQL-style logic to improve access to operational information, reducing response time by 100% and supporting continuous improvement of team processes.

Data Analyst Intern, MoMo (M_service)

November 2024 - April 2025

Onsite - Ho Chi Minh City

- Operated 2 production data pipelines processing 1M+ rows daily with 99.95% uptime, ensuring accurate and timely data inputs for recurring business reporting in a high-volume fintech environment.
- Designed and analysed A/B tests on AI Chatbot features, using statistical testing and KPI tracking to improve engagement by **10%** and inform 3 quarterly product launches.
- Delivered monthly KPI dashboards and business reviews to C-level stakeholders, training 5+ departments to interpret dashboard outputs and use insights for planning and decision-making.

FEATURED PROJECTS

Business Intelligence | ICMRA Strategic Analytics 2019-2025 (Power BI)

- Led university **Power BI** analytics project as Project Manager, coordinating requirements, analysis scope, dashboard delivery, and stakeholder presentation for an ICMRA strategic analytics brief covering 2019-2025.
- Built executive-ready reporting outputs to summarise multi-year strategic signals, performance patterns, and key insights, translating complex analytical findings into a clear visual narrative for client review.
- Achieved a high result and strong client satisfaction by managing delivery milestones, aligning the final dashboard and infographic to stakeholder expectations, and communicating recommendations clearly.

Economic Analytics | MacroBrief Time-Series Reporting Workflow (Python + Looker Studio)

- Built a repeatable workflow that fetches World Bank API indicators, normalises time-series data, and compares Australia, the United States, and Vietnam across GDP growth, inflation, unemployment, and exports.
- Produced comparison marts, stakeholder-ready commentary, and a **Looker Studio** dashboard to present trend changes clearly for non-technical audiences.

Data Analytics | Student Insights & FAQ Dashboard (Python + FastAPI)

- Structured 520 course-information pages into searchable datasets, surfacing recurring information gaps and building a **FastAPI** interface to support faster stakeholder access to answers.

EDUCATION

Bachelor of Data Science, Co-major in Business Analysis

2023 - 2026

Swinburne University of Technology, Melbourne

- Led capstone project as Project Manager, coordinating scope, delivery milestones, stakeholder updates, and final presentation; achieved a high result and strong client satisfaction for an industry-style analytics brief.
- Built practical exposure to **Power BI**, business intelligence tools, requirements analysis, stakeholder communication, and translating data outputs into business recommendations.

TECHNICAL SKILLS

Forecasting/BI: Excel (Pivot Tables, Advanced Formulas), Power BI, Looker, Tableau, KPI reporting

Analytics: Demand/trend analysis, exception reporting, data validation, A/B testing, stakeholder presentations

Languages: SQL, Python (Pandas, NumPy), R

Data Platforms: BigQuery, PostgreSQL, Snowflake, Google Cloud, AWS (S3, EC2), Git/GitHub
